

ADEOLU ISRAEL MESOGBORIWON

Data & Business Analyst | Process & Industrial Automation Engineer

Lagos, Nigeria | +2347037176627 | adeolu.mesogboriwon217@gmail.com

[LinkedIn](#) | [GitHub Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Data & Business Analyst with a background in Chemical Engineering and Industrial Process Engineering. Built 5 end-to-end data analytics and machine learning projects analyzing datasets ranging from 7,000 to 284,000 records. Proficient in Python, Power BI, SQL, pandas, and scikit-learn. Combines strong domain expertise in industrial processes with data science skills, making me uniquely valuable for manufacturing, fintech, oil & gas, and business analytics roles. Open to full-time, remote, and contract opportunities.

TECHNICAL SKILLS

- **Programming:** Python (pandas, NumPy, scikit-learn, Matplotlib, Seaborn, imbalanced-learn, XGBoost)
- **Tools:** SQL (PostgreSQL, MySQL) | Jupyter Notebook | Git & GitHub
- **Visualization:** Power BI (DAX, dashboards, slicers) | Tableau | Microsoft Excel
- **Machine Learning:** Classification, Regression, Random Forest, SMOTE, Model Evaluation (F1, ROC-AUC, Recall)
- **Analytics:** Data Cleaning, EDA, Feature Engineering, Statistical Analysis, Data Storytelling
- **Engineering:** PLC Programming | AutoCAD | Process Simulation | Production KPI Tracking

DATA ANALYTICS PROJECTS

1. Customer Churn Prediction | Python, scikit-learn, pandas | [churn-prediction Portfolio](#)

- Built a Random Forest classification model on 7,043 telecom customer records achieving 78.78% accuracy
- Performed EDA revealing month-to-month contract customers have the highest churn risk
- Identified contract type as the strongest churn predictor — business recommendation: offer discounts to upgrade customers to annual contracts
- Applied Label Encoding, feature selection, and identified and removed data leakage columns

2. Sales Performance Dashboard | Python, Power BI, pandas | [sales-dashboard Portfolio](#)

- Analyzed 9,800 retail orders totalling \$2.26M revenue across 4 US regions and 3 product categories
- Built a 5-visual interactive Power BI dashboard with year slicer, category/region/segment breakdowns
- Identified Technology as the highest revenue category (\$827K) and West region as top performer (\$710K)

- Extracted monthly sales trend showing consistent year-over-year growth with seasonal spikes

3. Credit Card Fraud Detection | Python, SMOTE, scikit-learn | [fraud-detection Portfolio](#)

- Handled extreme class imbalance (0.173% fraud rate) across 284,807 transactions using SMOTE oversampling
- Achieved 86% fraud recall and 89% precision — only 14 out of 98 fraud cases missed in test set
- Applied StandardScaler, Random Forest, and evaluated with confusion matrix and classification report
- Framed findings in business terms: each missed fraud = financial loss, recall is the critical metric

4. Job Market & Salary Analysis | Python, pandas, seaborn | [jobs-analysis Portfolio](#)

- Analyzed 9,355 data science job postings worldwide to identify salary trends by experience and work setting
- Found Analytics Engineering Manager as highest paid role (\$399K avg) and Executive level earning 2x Entry level
- Visualized top 10 highest paying roles, most common job categories, and remote vs in-person salary gaps

5. Healthcare Patient Readmission Analysis | Python, scikit-learn | [healthcare-readmission Portfolio](#)

- Predicted early hospital readmission for 100,244 diabetic patient records with 89% overall model accuracy
- Identified 11.22% early readmission rate; age group 20–30 showed highest risk at 14%
- Cleaned dataset by removing high-missing columns (weight: 98K missing), filtered diagnosis '?' values
- Showed longer hospital stays correlate with increased readmission risk — actionable for hospital administrators

PROFESSIONAL EXPERIENCE

Data Scientist & AI Intern

TedPrime Hub, Abeokuta, Nigeria (FGN-NITDA 3MTT Cohort 2) *June 2024 – November 2024*

- Performed comprehensive EDA on global COVID-19 datasets analyzing country trends and recovery rates
- Built a classification model to predict country-level trends using Python, pandas, and scikit-learn
- Conducted feature engineering, model evaluation (accuracy, precision, recall), and built interactive visualizations

Data Analyst Intern

Welup Digital Academy, Lagos, Nigeria *August 2023 – January 2024*

- Designed an interactive Power BI dashboard for sales KPIs covering revenue trends, regional performance, and customer segments.

- Cleaned raw datasets, removed inconsistencies, and created Python/Excel visualizations to communicate insights
- Analyzed datasets using SQL and created interactive dashboards in Tableau to visualize KPIs.

Production Supervisor

Industrial Projects International Nig Ltd, Abeokuta, Nigeria

Prior Role

- Utilized Excel and data insights to track production KPIs, minimize downtime, and improve operational efficiency
- Managed quality control data, flagged inconsistencies for corrective action, and led production reporting
- Leveraged data analysis to improve operations across a team environment

EDUCATION

B.Eng. Chemical Engineering

Federal University of Petroleum Resources, Effurun-Warri, Nigeria

November 2019

- Coursework: Mathematical Statistics | Probability | Linear Algebra | C/C++ | MATLAB | Technical Writing & Presentation

Data Analyst & Visualization Certificate

TedPrime Hub, Abeokuta, Nigeria (FGN-NITDA 3MTT Cohort 2) November 2024 | 6 months

CERTIFICATIONS & TRAINING

- Python for Everybody – University of Michigan
- IBM Data Science Foundations
- Google Data Analytics Certificate

SOFT SKILLS

Strong Attention to Detail | Analytical & Critical Thinking | Leadership | Communication (Oral & Written) | Time Management | Collaborative | Problem Solving | Data Storytelling

ADDITIONAL INFORMATION

- Open to full-time, part-time, internship, and contract data roles
- Available for remote work globally and on-site roles in Lagos and Nigeria
- Passionate about continuous learning and applying data to solve real business problems
