PROFESSIONAL SUMMARY

Machine Learning–focused Data Professional with hands-on experience building predictive models, performing feature engineering, and analyzing real-world datasets using Python and Scikit-learn. Combines a strong engineering background in production operations with data-driven problem solving to improve efficiency and decision-making. Skilled in model evaluation, data preprocessing, and visualization, with growing experience in deploying machine learning solutions via APIs. Passionate about solving real-world business problems using AI and data.

TECHNICAL SKILLS

Programming & Libraries: Python (Pandas, NumPy, Scikit-learn, Matplotlib)

Machine Learning: Classification, Regression, Clustering, Model Evaluation (Accuracy, Precision, Recall, F1-score)

Data Techniques: Feature Engineering, EDA, Data Cleaning, Statistical Analysis

Tools: Git, GitHub, Jupyter Notebook, APIs (Flask – beginner)

Databases: SQL (PostgreSQL, MySQL)

Visualization: Power BI, Excel, Matplotlib

PROFESSIONAL EXPERIENCES

Machine Learning / Data Science Intern

TedPrime Hub (FGN-NITDA 3MTT Program) — Abeokuta

June 2024 – Nov 2024

- Built a classification model to predict COVID-19 recovery trends using real-world datasets
- Performed feature engineering and preprocessing to improve model performance
- Evaluated models using accuracy, precision, and recall metrics

- Conducted exploratory data analysis (EDA) to identify key trends and patterns
- Developed visualizations to communicate insights to stakeholders

Tools: Python, Pandas, Scikit-learn, Matplotlib

Data Analyst Intern

Welup Digital Academy — Lagos

Aug 2023 – Jan 2024

- Designed an interactive Power BI dashboard to monitor sales KPIs and regional performance
- Identified revenue trends and customer segments to support business decisions
- Cleaned and transformed raw datasets to improve data quality and usability

Production Supervisor (Data-Driven Operations)

Industrial Projects International Nig Ltd — Abeokuta

- Monitored and analyzed production KPIs using Excel, improving operational efficiency
- Identified process inefficiencies using data insights and supported corrective actions
- Managed production reporting systems to ensure data accuracy and consistency
- Led a team while integrating data-driven decision-making into operations

MACHINE LEARNING PROJECTS

Customer Churn Prediction Model

- Building a classification model to predict customer churn using structured data
- Performing feature engineering and handling imbalanced datasets
- Evaluating model performance using F1-score and ROC metrics

Fraud Detection System

- Developing a model to detect fraudulent transactions
- Applying techniques for imbalanced data and anomaly detection
- Optimizing precision-recall tradeoffs for better fraud detection

COVID-19 Trend Prediction Model

- Built a classification model to predict recovery trends
- Performed EDA and feature engineering

- Evaluated model performance using standard ML metrics

EDUCATION

Data Science & Machine Learning Training

TedPrime Hub (FGN 3MTT Program), Abeokuta, Nigeria

November, 2024

B.Eng. Chemical Engineering

Federal University of Petroleum Resources, Effurun, Nigeria

November 2019

Relevant Coursework:

Statistics | Probability | Linear Algebra | Programming

CERTIFICATIONS

- 3MTT Data Science Program
- Python for Everybody – University of Michigan
- IBM Data Science Foundations (In Progress)
- Google Data Analytics (In Progress)

CORE COMPETENCIES

Machine Learning | Data Analysis | Feature Engineering

Problem Solving | Analytical Thinking | Communication

ADDITIONAL INFORMATION

- Open to remote Machine Learning and Data roles
- Actively building real-world ML projects and portfolio
- Interested in ML Engineering and AI systems
